SWEET TREATS COLOR WHEELS

Talk about eye candy! These delicious doughnuts add up to a visual feast when displayed on a dessert buffet or passed around late-night to refuel partygoers on the dance floor. And they come by their looks naturally: Contributing editor Peter Callahan, owner of Peter Callahan Catering, in New York City, used India Tree's vegetable-based food-dye kit to color the frosting (\$22, surlatable.com). That yellow hue?

It comes from turmeric. Green? Turmeric plus leafy veggies. Vivid pink? That's beet! Then, he finished each confection with sugared flowers (violets); fruit (coconut, pineapple, pomegranate); herbs (mint); sesame seeds; or lavender salt to add flavor.
